

Google Classroom Remote Learning

01 SIGN IN PAGE

Go to any google page, in this example www.classroom.google.com has been used.

03 PASSWORD

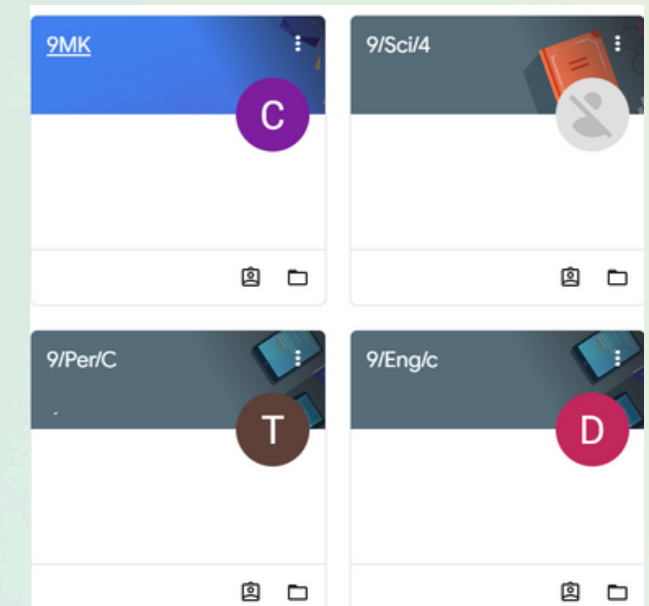

Enter your School Password. If you have any issues please contact the school for your username and password details

02 USERNAME

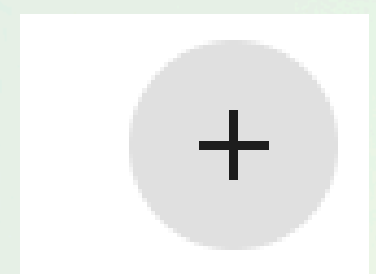

- The 1st part is your school username (the same used in school, e.g. '16SurnameF')
- The 2nd part (after the '@') does not change: @student.sasyorks.org

04 CLASSES

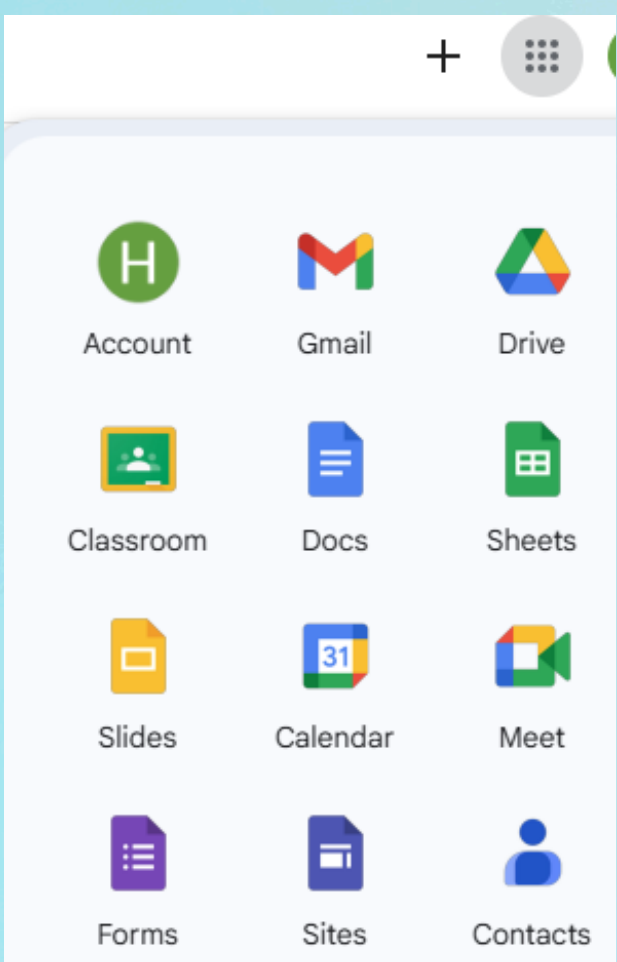

Your Google classes are automatically assigned to you but if you do have any issues or need to manually add a class click the + icon in the top right

Enter the class code and click Join

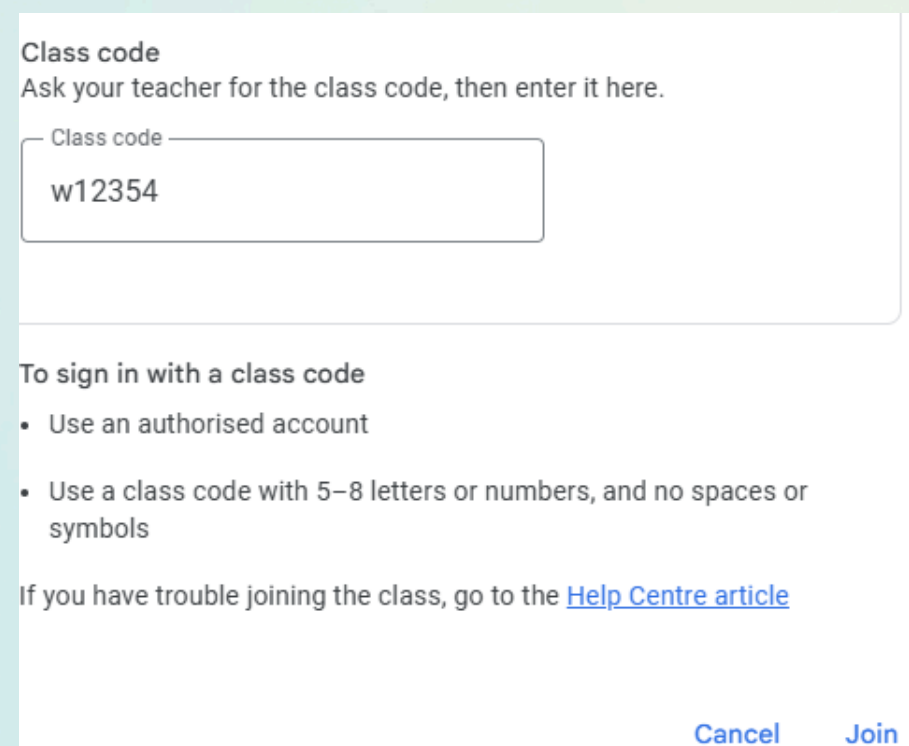

05 ACCESSING OTHER GOOGLE APPLICATIONS

Click the Waffle icon in the top right next to your name. Choose the Google application you wish to use

06 TROUBLE SHOOTING

- I signed in but Google keeps asking me to sign in, this is usually fixed if you sign in to a specific app e.g. mail.google.com instead
 - I can't get past the 'are you a robot' text part, it's annoying and may take several tries but users don't always notice that the password needs to be entered again on this page too!
 - Classroom codes don't work, this usually comes down to a personal and school account conflict, codes will only work when signed into a school account
- It says my account does not exist, double check your details again
(if you are new to the school you may not have an account and should contact school so we can look into it)
